

## URGENT WARNING FROM PFIZER PHARMACEUTICAL

Here is what a small portion of a Pfizer document released Wed 2:13 pm +00:00, 28 Apr 2021 is saying:

1. If a man who was not vaccinated touches a vaccinated woman, or breathes any of the air she breathes, (in other words, walks by her in the office) and he then has sex with his wife, his wife can have an adverse event and she should avoid having children.
2. If a woman who was never vaccinated gets exposed to a woman who was vaccinated, she can:
  - A. miscarry,
  - B. spontaneously abort,
  - C. poison a baby via her breast milk
  - D. Have babies that have cognitive difficulties.

\*\*\*\*\*

Which shots contain this problem? All shots in this list that contain the SARS virus.  
You can see the current list of vaccines here:

<https://www.precisionvaccinations.com/vaccines>

It is extensive. How many are a bio-weapon? A large percentage of them! Should you trust any of today's vaccines at all? You decide.

[Click here to see the brief where you can also access the full Pfizer report.](#)

I am trying to come up with a way to offset this bio-weapon and hope to accomplish that before too long. However, I fear that we will all witness the death of many before this is over according to recent research and Pfizer's own report.

Did you get the shot because you thought it would enable you to visit a loved one safely? Think again!

Below is a recently received bit of info along with links provided to it's referenced sources.

Doctors and scientists are trying to understand a troubling new phenomena called virus shedding. Those who have been inoculated with the experimental mRNA vaccines are causing those around them, predominately females, to suffer from some of the adverse side effects that those who have been vaccinated are. Women who have been through menopause are once again having monthly periods accompanied by very severe blood clotting and head aches. Others are having still births and experiencing strange bruising on their legs. Those effected are warning others to stay away from the vaccinated. It remains to be seen if other dangerous side effects will also be transferred as well. A whistle blower from a Vaccination Task Force says the doctors on the panel are very concerned about prion diseases showing up in the vaccinated months after taking the jab. Prion Diseases are fatal brain wasting diseases.

We just learned of someone that got the shot and two days later, this healthy person, is now in a coma with Brain hemorrhaging. She will likely be dead by next week. This shot is now called the suicide stick! How

many of them are deadly? You don't know. This is Russian roulette with only one chamber empty!
